

## Creating a Bouquet with the Egg Mechanic

1  
 Insert initial stems into both sides of the Egg, stabilizing the mechanic with your thumb and forefinger. Crisscross stems through the Egg's grid, working from the back to the front. Leave room for focal blooms.

2  
 Continue to incorporate greenery and texture, fortifying the structure of the design. By this point, the design will rest in your hand, supporting itself.

3  
 Add statement blooms, trailing vines or branches. Trim stems and make sure the mechanic is completely hidden. Tie off with ribbon for a finished look.

## Creating an Arrangement with the Pillow Mechanic

1  
 Start with an empty pillow resting on top of the vessel. Hold the pillow in place and insert stems in an X shape.

2  
 Begin to establish the shape you want with textured greens and colorful elements.

3  
 Go to town with big statement blooms, winding vines and grasses, using the pillow as a binding point.

## features and benefits

Use less product in your floral designs and still create full arrangements.

Mechanics save time in the design process.

Pillow Mechanic allows for direct access to fresh water source.

Mechanics made from recycled plastic and are recyclable.

Mechanics allow for easy transportability and quick installations.

# BELLA MOSS™

COLLECTION

## Using Moss as a Mechanic

Moss Mats & Spheres add beautiful layers to tablescapes.

Provides decoration and layers in terrariums.

Use as a decorative mechanic to cover Aquafoam® & Aquaforms®.

Use as a decorative mechanic for covering the tops of plants in grower pots.

## FEATURES AND BENEFITS

All-natural and sustainably sourced.

Long-lasting with better fade resistance.

Pliable and soft to the touch.

Adds polish to designs to increase perceived value.

Offer personalization using moss as a creative accent to any arrangement.
